Detail-oriented, hard-working, and problem-solving professional offering 8+ years of customer service and conflict resolution experience, including over a year of IT. Proven ability to manage multiple projects with conflicting and challenging deadlines.

Skills

- JavaScript, Python, Node.js, React, React Native, Express, Redux, RESTful API, PostgreSQL, Sequelize, Bootstrap, HTML, CSS, Deployment, Debugging, Firebase
- Adobe Creative Suite, Statistical software, Coding data, CRM, Conflict resolution, Customer Service

Software Development Portfolio

Old Wall Site | https://github.com/abbeyperini/OldWallSite | Sep 2020
- Given code from an XML1 site from the 90's, I started by copying the design as exactly as possible in HTML5 and CSS. Using CSS flexbox and grid, I designed responsive layouts for mobile and tablet. I wanted to keep all the assets original, but had to replace the main background image for the tablet and desktop views.

Knitworthy | http://knitworthy.net/ | https://github.com/abbeyperini/Knitworthy | Oct 2020
- Knitworthy produces "fun facts" that compare Ravelry API project time and yarn data to real life time and length measurements. It was built by a 4-person team with HTML, CSS, Javascript, Bootstrap, Surge. I found the correct API endpoints, wrote the main functionality for the "fun facts" in Javascript, designed the logo and theme, and wrote a lot of the CSS, including the "Filters" drop down menu.

BujoToGo | http://bujo-to-go.surge.sh | https://github.com/abbeyperini/BujoToGo | Dec 2020
- BujoToGo is a to do list app based on Ryder Carroll's Bullet Journal system. View your bulleted items in monthly, weekly, and daily spreads - traditional or calendar style. Bullets are stored with date time strings and returned in chronological order based on the time range of the view. In one week, I built this app using CSS, Javascript, Nodejs, Express, Sequelize, PostgreSQL, React, Redux, and FullCalendar.

Professional Experience

Randstad Engineering
Talent Services Manager | Nov 2015 - Aug 2020
- Maintained accurate records in web portals, CRM, and team documents
